

Unintentional Drug- and Alcohol-Related Intoxication Deaths* in Maryland

Preliminary data update through 1st quarter 2018

This report contains counts of unintentional drug- and alcohol-related intoxication deaths* occurring in Maryland through the 1st quarter of 2018, the most recent period for which preliminary data are available. Counts are also shown for the same period of 2007-2017 to allow for review of trends over time. Counts for 2017 and 2018 are not complete and are subject to change.

Since an intoxication death may involve more than one substance, counts of deaths related to specific substances do not sum to the total number of deaths.

*Deaths resulting from recent ingestion or exposure to alcohol or other types of drugs, including heroin, prescription opioids, prescribed and illicit forms of fentanyl (including carfentanyl), cocaine, benzodiazepines, phencyclidine (PCP), methamphetamines and other prescribed and unprescribed drugs.

MARYLAND
Department of Health

Figure 1. Total Number of Unintentional Intoxication Deaths Occurring in Maryland from January-March of Each Year.*

*2017, 2018 counts are preliminary.

Figure 2. Number of Opioid-Related Deaths Occurring in Maryland from January through March of Each Year.*

*2017, 2018 counts are preliminary.

Figure 3. Number of Heroin-Related Deaths Occurring in Maryland from January through March of Each Year.*

*2017, 2018 counts are preliminary.

Figure 4. Number of Fentanyl-Related Deaths Occurring in Maryland from January through March of Each Year.*

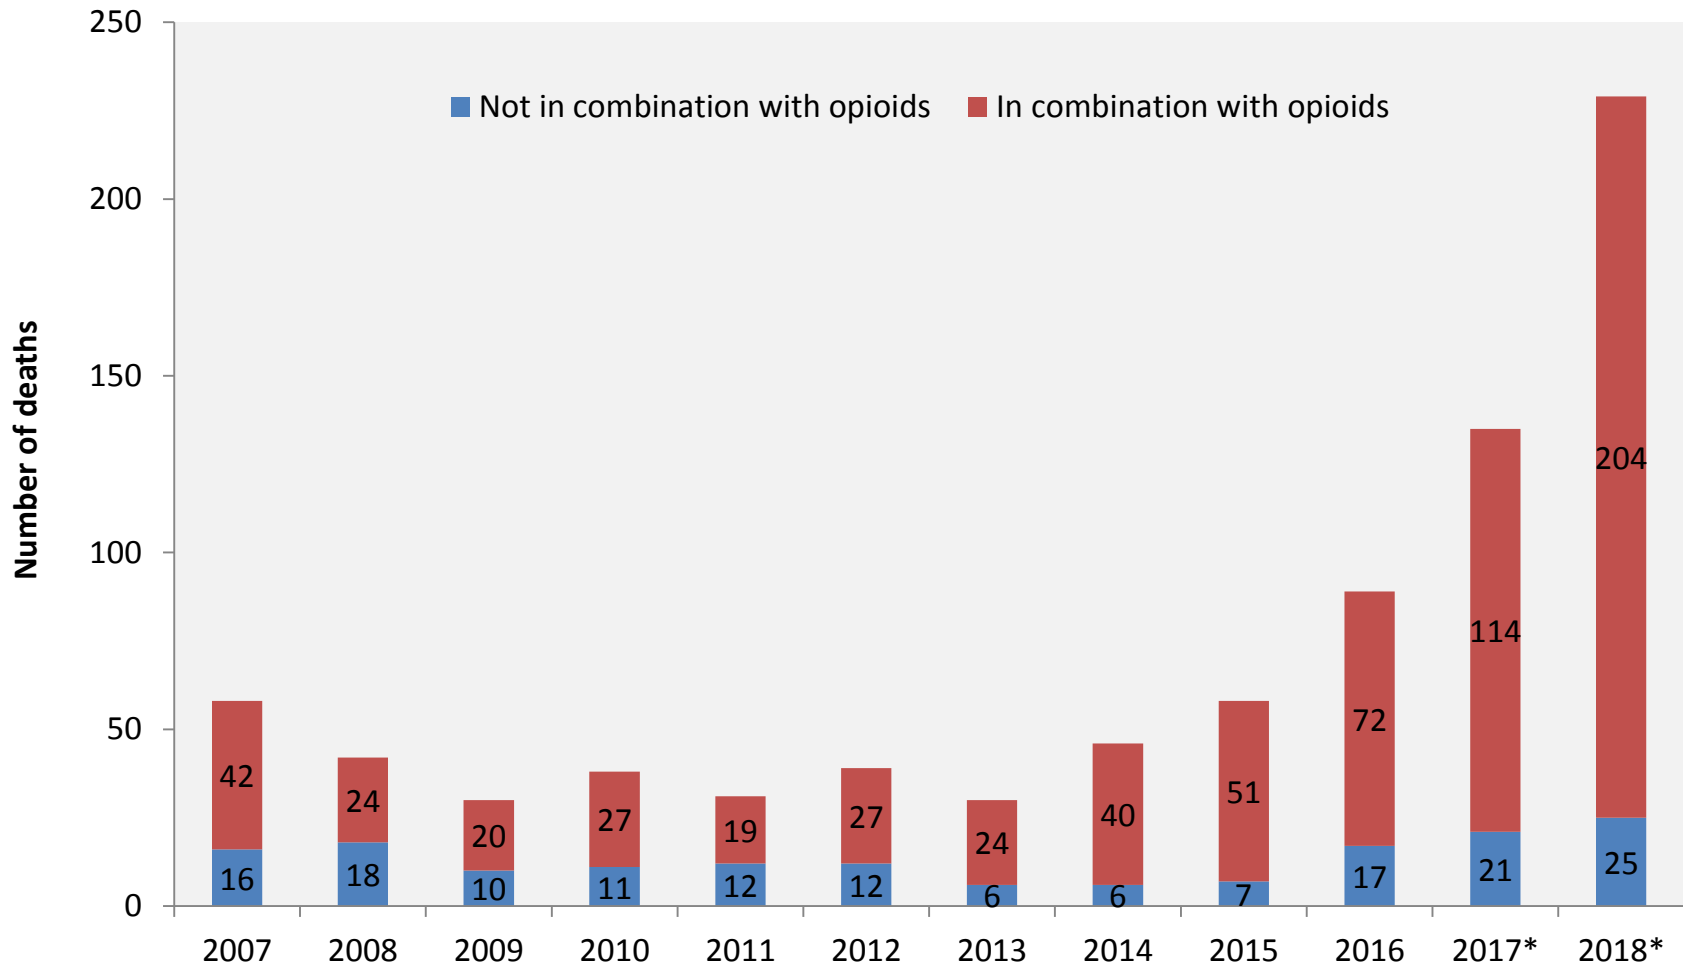

*2017, 2018 counts are preliminary.

Figure 5. Number of Prescription Opioid-Related Deaths Occurring in Maryland from January through March of Each Year.*

*2017, 2018 counts are preliminary.

Figure 6. Number of Cocaine-Related Deaths Occurring in Maryland from January through March of Each Year.*

*2017, 2018 counts are preliminary.

Figure 7. Number of Alcohol-Related Deaths Occurring in Maryland from January through March of Each Year.*

*2017, 2018 counts are preliminary.
